

EMAS Logo and Accompanying Text

ES4

The logo may be used only by EMAS registered organisations, as long as their registration is valid. It must always be accompanied by the registration number of the organisation.

The logo must be used with the English text, as shown here, or with the Irish, 'Bainistíocht comhshaoil fíoraithe', or by the equivalent text in any of the 23 official Community languages. Full details of the equivalent text, if needed, are in Annex V of the regulation.

If an organisation has corporate registration, and chooses not include all of its sites in the corporate registration, then it must ensure that in its communications with the public and in its use of the EMAS logo it is clear which sites are covered by the registration.

The EMAS logo cannot be used:
(a) on products or their packaging; or
(b) in conjunction with comparative claims concerning other activities and services or in a way that may create confusion with environmental product labels.

Environmental information published by a registered organisation may bear the EMAS logo provided such information makes reference to the organisation's latest validated environmental statement.

The EMAS logo without a registration number may be used by Competent Bodies, Accreditation and Licensing Bodies, national authorities and other stakeholders for EMAS-related marketing and promotional purposes.

The logo must be used either

- in three colours (Pantone No. 355 Green; Pantone No. 109 Yellow; Pantone No. 286 Blue);
- in black;
- in white; or
- in greyscale.

For further information, please contact The Irish National Accreditation Board.
